CALCONNECT STANDARD

WORKING DRAFT

WARNING FOR DRAFTS

This document is not a CalConnect Standard. It is distributed for review and comment, and is subject to change without notice and may not be referred to as a Standard. Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

CONTENTS

FOREWORD

The Calendaring and Scheduling Consortium (“CalConnect”) is a global non-profit organization with the aim to facilitate interoperability of collaborative technologies and tools through open standards.

CalConnect works closely with international and regional partners, of which the full list is available on our website (<https://www.calconnect.org/about/liaisons-and-relationships>).

The procedures used to develop this document and those intended for its further maintenance are described in the CalConnect Directives.

In particular the different approval criteria needed for the different types of CalConnect documents should be noted. This document was drafted in accordance with the editorial rules of the CalConnect Directives.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CalConnect shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be provided in the Introduction.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

This document was prepared by Technical Committee *LOCALIZATION*.

INTRODUCTION

A number of international applications require the identification of script conversion systems, including for terminology, lexicography, bibliography, and linguistics, especially for reverse transliteration, computational linguistics and machine pronunciation.

This standard sets out the necessary procedures to maintain the registry of script conversion systems.

1. SCOPE

This International Standard provides a code for the presentation of script conversion systems.

The codes were devised for usage of any application requiring the expression of script conversion systems, including transliteration and romanization systems, in coded form.

2. NORMATIVE REFERENCES

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

- ISO 639 (all parts), *Code for the representation of names of languages*
- ISO 5127:2017, *Information and documentation – Foundation and vocabulary*
- ISO 15924:2004, *Information and documentation – Codes for the representation of names of scripts*

3. TERMS AND DEFINITIONS

For the purposes of this document, the following terms and definitions apply.

3.1. script

particular graphic representation or class of representations of a set of characters used to write one or more *languages* (Clause 3.2)

[SOURCE: ISO 5127:2017, Clause 3.1.6.02]

3.2. language

systematic use of sounds, characters, symbols or signs to express meaning or communicate meaning or a message

[SOURCE: ISO 5127:2017, Clause 3.1.5.01]

3.3. script conversion

transliteration (Clause 3.4) or *transcription* (Clause 3.5)

3.4. transliteration

operation to convert a *script* (Clause 3.1) into another script without change of *language* (Clause 3.2) based on orthographic features of the source script

3.5. transcription

operation to convert spoken *language* (Clause 3.2) or a *script* (Clause 3.1) to another script without change of language based on phonetic features of the language and orthographic features of the source script

3.6. romanization

script conversion (Clause 3.3) from non-Roman to Roman script by means of *transliteration* (Clause 3.4), transcription <activity> or both

[SOURCE: ISO 5127:2017, Clause 3.1.6.14]

3.7. transliteration system

a set of rules for *transliteration* (Clause 3.4) of a source *script* (Clause 3.1) to a target script

3.8. romanization system

a set of rules for *romanization* (Clause 3.6) of a source *script* (Clause 3.1) to a target script

3.9. script conversion system

a set of rules for *script conversion* (Clause 3.3)

3.10. code

data (ISO 5127:2017, Clause 3.1.13.10) transformed or represented in different forms according to a pre-established set (3.1.1.09) of rules

[SOURCE: ISO 5127:2017, Clause 3.1.13.10, modified – Note 1 to entry is omitted.]

3.11. language code

combination of characters used to represent the name of a *language* (Clause 3.2) or languages

[SOURCE: ISO 5127:2017, Clause 3.2.5.14]

3.12. script code

combination of characters used to represent the name of a *script* (Clause 3.1)

[SOURCE: ISO 15924:2004, Clause 3.8]

3.13. script conversion system code

code (Clause 3.10) used to represent a *script conversion system* (Clause 3.9)

4. COMMON DATA ATTRIBUTES

4.1. General

The data models in this clause are used by other data models specified in this document.

4.2. Data models

Figure 1

4.3. Usage of ISO 639 code elements

iso639Code represents code elements from ISO 639-1, ISO 639-2, ISO 639-3 and ISO 639-5 for reference to languages.

4.4. Usage of ISO 15924 code elements

iso15924Code represents code elements from ISO 15924:2004 for reference to scripts.

4.5. Usage of ISO 8601 expressions

iso8601Expression represents datetime expressions that are compliant with [ISO8601].

5. SCRIPT CONVERSION SYSTEM AUTHORITY

5.1. General

A script conversion system authority is a competent authority that creates, publishes and/or manages definitions of script conversion systems. Authorities that are no longer competent will depend on ISO 24229/AG for managing codes, which will be considered on a case-by-case basis.

5.2. Requirements

5.2.1. General

A script conversion system authority should:

- a. have at least one script conversion system eligible for a script conversion system code;
- b. be competent in managing its script conversion systems (Clause 5.2.4).

5.2.2. Inactive authorities

If a script conversion system authority does not meet requirements outlined in Clause 5.2.1, b), it is considered “inactive”.

5.2.3. Reserved authorities

The “Various systems” script conversion system authority is managed by ISO 24229/AG to represent script conversion systems that:

- a. have a need to be represented as determined by ISO 24229/AG;
- b. yet do not have a clear extant authority.

5.2.4. Competency

A competent script conversion system authority is one that has standardized processes surrounding the management of the script conversion systems, covering at least the following processes:

- a. planning of script conversion systems, including the process of designing and defining script conversion systems;
- b. performing changes to script conversion systems are well planned;
- c. public announcement and dissemination of its script conversion systems; and
- d. allows a public review period for people affected by script conversion systems under its management prior to enactment.

5.3. Registration

The ISO 24229/AG is tasked with managing a list of script conversion system authorities.

5.4. Data model and attributes

5.4.1. General

Figure 2

5.4.2. authorityCode

A code that represents the script conversion system authority.

5.4.3. name

The identifiable short name that uniquely identifies the script conversion system authority.

5.4.4. remarks

Any further notes.

5.5. Code and identifier

5.5.1. Principles for inclusion in the list of script conversion system authority

5.5.1.1. List

The list of script conversion system authorities in this document includes known authorities, such as ISO.

5.5.1.2. Source of names

Names and abbreviations of script conversion systems are obtained from the script conversion system authorities.

5.5.1.3. Current status of names

Script conversion system authorities listed in this document are intended to reflect the current situation, at the time of issue of the latest update of this document.

5.5.2. Principles for allocation of code elements

5.5.2.1. Relationship with names

The principle behind the alphabetic codes for script conversion system authorities is a visual association between the script conversion system authorities and their corresponding code elements.

In applying this principle, the code elements have generally been assigned on the basis of the abbreviated names of the script conversion system authorities, thus avoiding, wherever possible, any reflection of their political status.

EXAMPLE 1

`iso` for ISO.

EXAMPLE 2

`bgnpcgn` for the United States Board on Geographic Names – Permanent Committee on Geographical Names for British Official Use.

5.5.2.2. Construction of the alphabetic code

The following rules are to be adhered to for the assignment of the alphabetic code:

- The alphabetic code uses combinations, in lower case, of a maximum of 16 letters of the 26-character Latin alphabet.
- The minimal length of the code is 3 letters to encourage descriptive and distinguishable alphabetic names.
- Codes with 2 letters are reserved for codes in ISO 3166-1, each representing the administration authority of the particular jurisdiction.
- The specific code prefix of `xx` is reserved and is used as the prefix of user-assignable script conversion system authority codes.

5.5.2.3. User assigned code elements

If users need code elements to represent script conversion system authorities not included in the script conversion system authority registry, the code prefix of `xx` can be used, being a reserved code point `xx` for private user assignment.

The code length for the script conversion system authority identifier must be 3 or more letters.

EXAMPLE

xxunece is an example of a user-assigned private code for a script conversion system authority published by the UN/ECE.

NOTE Users are advised that the above series of codes are not universally used, those code elements are not compatible between different entities.

5.5.3. List of script conversion system authority codes and their data elements

The list of script conversion system authority codes is initially defined in [Appendix B](#). Additional and new entries will be provided by the ISO 24229/RA.

Data attributes provided in the list are defined in [Clause 5.4](#).

6. SCRIPT CONVERSION SYSTEMS

6.1. General

Script conversion systems are used to convert writing systems into other scripts, and in the case of romanization systems, into Roman script.

6.2. Data model and attributes

6.2.1. General

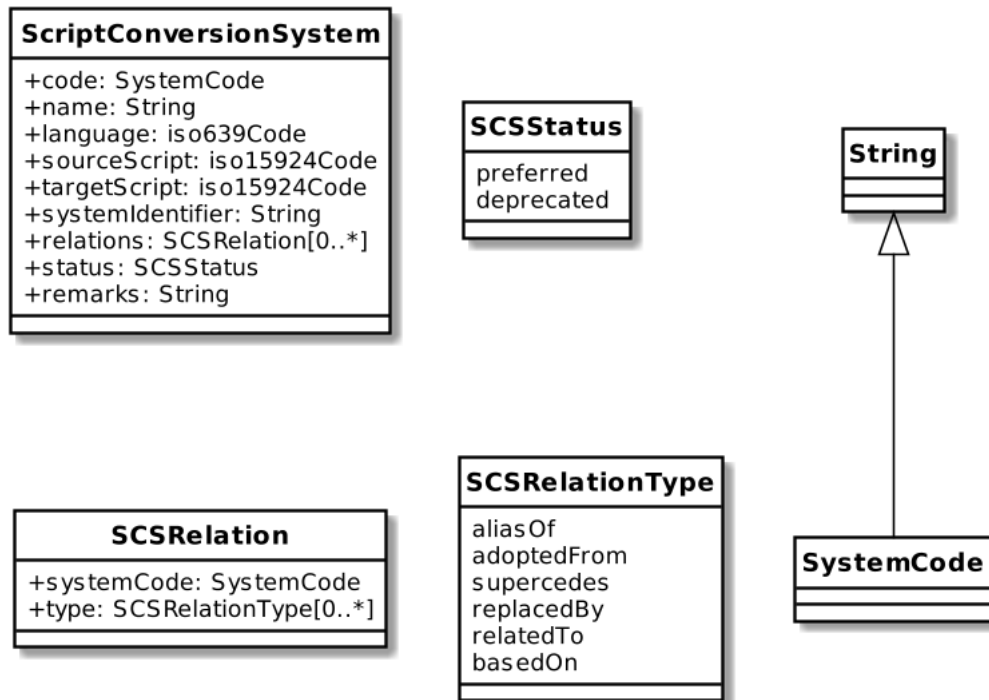

Figure 3

6.2.2. code

A code that identifies the script conversion system.

6.2.3. name

A name that represents the script conversion system.

6.2.4. language

The language code that identifies the source language being processed by the script conversion system.

The language code should be qualified to a source of language codes. For example, ISO 639-1, ISO 639-2, ISO 639-3, ISO 639-5 contain language codes that can be selected from.

If a synonym is used from ISO 639-2, the ISO 639-2/T associated code should be used. ISO 639-2/T codes are intended to be used for terminology applications.

6.2.5. sourceScript

The script code of the script used in the source text. This code is from ISO 15924:2004.

6.2.6. targetScript

The script code of the script used in the output text. This code is from [ISO 15924:2004](#).

6.2.7. systemIdentifier

A system may be uniquely identified, amongst systems maintained by the same authority, by an identifier, an edition, a version or a sequence of characters.

This element is mandatory if the authority manages or plans to manage multiple script conversion systems.

It may be derived from the adoption date if and only if that does not cause duplicates. Otherwise the adoption date shall be complemented by the name or number of the standard / technical specification, or some other data element.

EXAMPLE

2013 is the system identifier of the system coded as un-lao-lao-latn-2013.

6.2.8. relations

Script conversion systems can be related to other script conversion systems in a number of ways. For example, a script conversion system may represent an adoption or variant of another script conversion system.

Hierarchical structures of script conversion systems can be constructed by means of relationships.

This element is optional.

aliasOf	the current system is an alias to the target system, the script conversion process is identical
adoptedFrom	the current system is adopted from the target system, the script conversion process may not be identical
supercedes	the current system supercedes the target system
replacedBy	the current system is replaced by the target system
relatedTo	the current system is related to the target system
basedOn	the current system is based on the target system, the script conversion process inherits certain attributes from the target system.

6.2.9. status

A system code may be optionally marked as deprecated or preferred.

NOTE The deprecation marker in no way indicates deprecation of the system itself.

6.2.10. remarks

Any further notes.

The date of the adoption of the script conversation system by the authority may be noted in the remarks.

A typical use case is to show its original code from the original system from where this code has been imported.

EXAMPLE

NOTE: OGC 11-122r1 code urd_Arab2Latn_ODNI_2004

6.3. Code and identifier

6.3.1. Principles for inclusion in the list of transliteration and romanization systems

6.3.1.1. List

The list of script conversion systems in this document includes known transliteration and romanization systems from official sources.

6.3.1.2. Source of names

Names and description of script conversion systems are obtained from authoritative sources.

6.3.1.3. Current status of names

Script conversion systems listed in this document are intended to reflect the current situation, at the time of issue of the latest update of this document.

6.3.2. Principles for allocation of code elements

6.3.2.1. Relationship with names

The code for a script conversion system has the structure of a list, with all elements joined by a “FIGURE DASH” character (“-”, Unicode U+2012).

The elements must conform to the following order:

- `authority-code` designates the authority that manages the transliteration system;
- `lang-code` designates the ISO-639 language code the transliteration system processes;
- `source-script-code` designates the script code of the text taken as input by the transliteration system;
- `target-script-code` designates the script code of the text produced by the transliteration system;
- `system-identifier` designates a unique identifier for the transliteration system, such as edition year, document identifier, and system name.

EXAMPLE 1

`ala1c-mal-mlym-latn-2012` for the ALA-LC Romanization system that transliterates the Malayam language from Malayam script characters into Latin script. The system identifier here is considered to be `2012`.

EXAMPLE 2

`iso-ukr-Cyrl-Latn-9-1995` for the transliteration system that transliterates the Ukrainian language from Cyrillic script into Latin script according to [IWA 9 \(all parts\)](#). The system identifier here is considered to be `9-1995`.

6.3.2.2. Construction of the authority codes

The following rules are to be adhered to for the assignment of the authority codes:

- The authority code uses combinations, in lower case, of the 26-character Latin alphabet.
- Codes shall encourage descriptive and distinguishable alphabetic names.
- Two-character authority codes are reserved for [ISO 3166-1](#) codes, which designate that the authority is the government that is represented by the particular [ISO 3166-1](#) code.

6.3.2.3. Construction of the language code

The language code must be a code listed in any part of [ISO 639 \(all parts\)](#).

EXAMPLE 1

`iso-ara-arab-latn-233-2-1993` applies to the Arabic language written in arabic script.

When a script conversion system applies to more than one language, the script conversion authority that manages that system should determine which of the following approaches should be taken:

- a. consider this system as multiple systems, with each individual systems applying to a single language code; or
- b. consider this system as a single system, where the [ISO 639-3](#) code of `mul` applies.

EXAMPLE 2

`icao-mul-arab-latn-2015` applies to multiple languages written in Arabic script, and is encoded as a single system.

EXAMPLE 3

`din-bel-cyrl-latn-1460-1982` and `din-bul-cyrl-latn-1460-1982` are both defined in [DIN 1460](#), but they are encoded as separate systems for separate languages.

6.3.2.4. Construction of the script codes

The script code must be a code listed in [ISO 15924:2004](#).

6.3.2.5. User assigned system codes

If users need system codes to represent transliteration and romanization systems not included in the script conversion system registry, the code prefix of zz can be used.

The code for such a system has the structure of a list, with all elements joined by a “FIGURE DASH” character (“-”, Unicode U+2012).

The elements must conform to the following order:

- the literal string zz
- authority-code
- lang-code
- source-script-code
- target-script-code
- system-identifier

NOTE Users are advised that the above series of codes are not universally used, those code elements are not compatible between different entities.

6.3.3. List of script conversion system codes and their data elements

The list of script conversion system codes is initially defined in [Appendix C](#). Additional and new entries will be provided by the ISO 24229/RA.

Data attributes provided in the list is defined in [Clause 6.2](#).

APPENDIX A (NORMATIVE) REGISTRATION

A.1. Registration authority (ISO 24229/RA)

A registration authority (ISO 24229/RA) has been appointed to operate under guidelines provided in this Annex.

It has been entrusted with the following functions with regard to the list of script conversion system authorities and script conversion systems, together with code assignments and information associated with each entry:

- a. to add and eliminate these entries, in accordance with the rules in this document;
- b. to advise users and ISO member bodies regarding application of such information;
- c. to update and disseminate such information;
- d. to maintain a reference list of such information;
- e. to publish changes made to such information and the history of changes allowing traceability;
- f. to administer the reservation of the codes.

Changes to the content of the list of entries becomes effective immediately upon publication.

The criteria provided in [Appendix A.3](#) to [Appendix A.4](#) shall be observed by the ISO 24229/RA for changes to the list of script conversion system authorities and script conversion systems, their code assignments and associated information, and for reservations of code elements.

A.2. Advisory group (ISO 24229/AG)

An advisory group (ISO 24229/AG) has been appointed to ensure the operations of the registration authority (ISO 24229/RA) are in accordance with guidelines provided in this Annex.

A.3. Operations on list of script conversion system authorities and their codes

A.3.1. Registration of a new script conversion system authority

Additions to the list of script conversion system authority codes shall be made on upon request from a member of the ISO 24229/AG.

A script conversion system authority is eligible for registration if it meets the requirements stated in [Clause 5.2](#).

The proposer is responsible for providing justification to the ISO 24229/AG regarding the eligibility of such addition.

The ISO 24229/AG will decide upon the addition, on the basis of eligibility and usage justification.

Code elements will be allocated by the ISO 24229/AG at its discretion.

A.3.2. Marking a script conversion system authority inactive

A script conversion system authority can be marked inactive by ISO 24229/AG if the authority ceases to exist or no longer wishes to register its script conversion systems.

Such inactive status shall be considered by the ISO 24229/AG upon request from the script conversion system authority itself or a member of the ISO 24229/AG.

The ISO 24229/AG at its sole discretion, will determine what information will remain on the basis of practicality and continuity of usage.

A.3.3. Modification of script conversion system authority code

Modifications of an entry within the list of script conversion system authority codes shall be made upon the request of a member of ISO 24229/AG.

The ISO 24229/AG will decide upon the modification, on the basis of the information received.

The previously assigned code is reserved after modification for backwards-compatibility purposes.

A.3.4. Modifications to information associated with codes

Modifications to a registered element shall be made upon requests from a member of the ISO 24229/AG or the script conversion system authority.

A significant change of name may require the ISO 24229/AG to change the alpha code element concerned. The ISO 24229/AG, however, shall endeavor to maintain stability in the list of code elements.

A.3.5. Inactive authorities

If a script conversion system authority is marked inactive, the responsibility of maintaining its script conversion system entries are assumed by ISO 24229/AG.

A.3.6. Reserved authorities

The “Various systems” script conversion system authority is assigned the code `var` is managed by ISO 24229/AG to represent script conversion systems with need for representation but do not have a clear authority.

EXAMPLE

The Wade-Giles Chinese transliteration system from *A Chinese-English Dictionary* is represented as `var-zho-hani-latin-1912`.

A.4. Operations on list of script conversion systems and their codes

A.4.1. Registration of a new script conversion system

Additions to the list of script conversion system codes shall be made on the basis of information from upon the request of a member of ISO 24229/AG or the script conversion system authority that manages this system.

The ISO 24229/AG will decide upon the addition, on the basis of the justification given for the actual requirements for international interchange. Code elements will be allocated accordingly.

A script conversion system is eligible for a script conversion system code assignment if it fulfills one of the following criteria:

- The system has been approved for official use at some level of government;
- The system has been developed and used by educational/scientific institutions, published in a peer reviewed scientific publication;
- The system has been in substantial usage.

Assigning of a script conversion system code also requires demonstration of one of the following usage factors:

- Necessity of identification of the system in interchange;
- Necessity of identification of the system in data encoding.

NOTE Systems that are used in isolation or only for temporary usage does not need to be assigned codes.

A.4.2. Deprecation of a script conversion system

Deprecation of script conversion system codes shall be made upon request of a member of ISO 24229/AG or the script conversion system authority that manages the system.

The ISO 24229/AG will decide upon the marking of deprecation, on the basis of the information received. The corresponding code element is reserved for backwards-compatibility.

NOTE Deprecation only applies to the code representation of the script conversion system, and not the system itself. For example, when the authority undergoes a rename.

A.4.3. Alterations to a script conversion system

Alterations to a registered element shall be made only upon request of a member of ISO 24229/AG or the script conversion system authority that manages the system.

A significant change of name may require the ISO 24229/AG to change the alpha code element concerned. The ISO 24229/AG, however, shall endeavor to maintain stability in the list of code elements.

A.5. Reservation of code elements

A.5.1. Introduction

Some code elements are reserved:

- for a limited period when their reservation is the result of the deprecation (Appendix A.4.2) or the alteration (Appendix A.4.3) of an entry;
- for an indeterminate period when the reservation is the result of the application of international law or of exceptional requests (Appendix A.5.3).

A.5.2. Period of non-allocation

Code elements that the ISO 24229/AG has altered or deleted should not be reallocated during a period of at least ten years after the change.

The exact period is determined in each case on the basis of the extent to which the former code element was used.

A.5.3. Exceptional reservations

Code elements may be reserved, in exceptional cases, for script conversion systems authorities and script conversion systems which the ISO 24229/AG has decided not to include in the lists maintained by ISO 24229/RA, but for which an interchange or encoding requirement exists.

A.5.4. Reallocation

Before reallocating a former code element or a formerly reserved code element, the ISO 24229/AG shall consult, as appropriate, the authority or agency on whose behalf the code element was reserved, and consideration shall be given to difficulties which might arise from the reallocation.

A.5.5. List of reserved code elements

A list of reserved code elements is kept by the ISO 24229/RA.

A.6. Advice regarding use of code elements

The ISO 24229/AG is available for consultation and assistance on the use of codes for script conversion system authorities and script conversion systems.

Script conversion system name	ALA-LC Romanization Table – Urdu (2013)
Script conversion system authority code	alalc
Language code type	iso-639-2
Language codes	urd
Source script code (ISO 15924)	Arab
Target script code (ISO 15924)	Latn
System ID	2013
System specification	ALA-LC Romanization Table – Urdu (2013)
Relationships	
Status	
Notes	2013

Table C.132 – ALA-LC Romanization Table – Uzbek (2017)

Script conversion system code	alalc-uzb-arab-latn-2017
Script conversion system name	ALA-LC Romanization Table – Uzbek (2017)
Script conversion system authority code	alalc
Language code type	iso-639-2
Language codes	uzb
Source script code (ISO 15924)	Arab
Target script code (ISO 15924)	Latn
System ID	2017
System specification	ALA-LC Romanization Table – Uzbek (2017)
Relationships	
Status	
Notes	2017

Table C.133 – ALA-LC Romanization Table – Vai (2011 rev)

Script conversion system code	
--------------------------------------	--

	alalc-vai-vai-latn-2011
Script conversion system name	ALA-LC Romanization Table – Vai (2011 rev)
Script conversion system authority code	alalc
Language code type	iso-639-2
Language codes	vai
Source script code (ISO 15924)	Vai
Target script code (ISO 15924)	Latn
System ID	2011
System specification	ALA-LC Romanization Table – Vai (2011 rev)
Relationships	
Status	
Notes	2011 rev

Table C.134 – ALA-LC Romanization Table – Tod-Oirat-Old Kalmyk (2012)

Script conversion system code	alalc-xal-mong-latn-2012
Script conversion system name	ALA-LC Romanization Table – Tod-Oirat-Old Kalmyk (2012)
Script conversion system authority code	alalc
Language code type	iso-639-2
Language codes	xal
Source script code (ISO 15924)	Mong
Target script code (ISO 15924)	Latn
System ID	2012
System specification	ALA-LC Romanization Table – Tod-Oirat-Old Kalmyk (2012)
Relationships	
Status	
Notes	2012, xal refers to Kalmyk; Oirat, need verification

Table C.135 – ALA-LC Romanization Table – Hebrew and Yiddish (2011)

Script conversion system code	alalc-yid-hebr-latn-2011
Script conversion system name	ALA-LC Romanization Table – Hebrew and Yiddish (2011)
Script conversion system authority code	alalc
Language code type	iso-639-2
Language codes	yid

Source script code (ISO 15924)	Hebr
Target script code (ISO 15924)	Latn
System ID	2011
System specification	ALA-LC Romanization Table – Hebrew and Yiddish (2011)
Relationships	
Status	
Notes	2011

Table C.136 – ALA-LC Romanization Table – Moroccan Tamazight (2012)

Script conversion system code	alalc-zgh-tfng-latn-2012
Script conversion system name	ALA-LC Romanization Table – Moroccan Tamazight (2012)
Script conversion system authority code	alalc
Language code type	iso-639-2
Language codes	zgh
Source script code (ISO 15924)	Tfng
Target script code (ISO 15924)	Latn
System ID	2012
System specification	ALA-LC Romanization Table – Moroccan Tamazight (2012)
Relationships	
Status	
Notes	2012

Table C.137 – ALA-LC Romanization Table – Chinese (1997)

Script conversion system code	alalc-zho-hani-latn-1997
Script conversion system name	ALA-LC Romanization Table – Chinese (1997)
Script conversion system authority code	alalc
Language code type	iso-639-2
Language codes	zho
Source script code (ISO 15924)	Hani
Target script code (ISO 15924)	Latn
System ID	1997
System specification	ALA-LC Romanization Tables
Relationships	
Status	

Notes	NOTE OGC 11-122r1 code zho_Hani2Latn_ALA_1997

Table C.141 – ANSI Z39.11-1972 American National Standard System for the Romanization of Japanese

Script conversion system code	ansi-jpn-hrkt-Latn-z39-11-1972
Script conversion system name	ANSI Z39.11-1972 American National Standard System for the Romanization of Japanese
Script conversion system authority code	ansi
Language code type	iso-639-2
Language codes	jpn
Source script code (ISO 15924)	Hrkt
Target script code (ISO 15924)	Latn
System ID	z39-11-1972
System specification	ANSI Z39.11
Relationships	
Status	
Notes	Adoption date: 1972

Table C.142 – Toponymic Guidelines for Antarctica

Script conversion system code	apcbg-bul-cyrl-latn-1995
Script conversion system name	Toponymic Guidelines for Antarctica
Script conversion system authority code	apcbg
Language code type	iso-639-2
Language codes	bul

Source script code (ISO 15924)	Cyrl
Target script code (ISO 15924)	Latn
System ID	1995
System specification	Toponymic Guidelines for Antarctica
Relationships	
Status	
Notes	Adoption date: 1995-03-02

Table C.143 – Republic of Moldova Romanization

Script conversion system code	asm-ron-cyrl-latn-2016
Script conversion system name	Republic of Moldova Romanization
Script conversion system authority code	asm
Language code type	iso-639-2
Language codes	ron
Source script code (ISO 15924)	Cyrl
Target script code (ISO 15924)	Latn
System ID	2016
System specification	Republic of Moldova Romanization
Relationships	
Status	
Notes	Adoption date: 2016-10-17; Note: Adopted by Moldova Order No; 872 on the application of the revised spelling rules as adopted by the Moldovan Academy of Sciences

Table C.144 – Azerbaijan Government – Alphabet Transition from Cyrillic to Latin

Script conversion system code	az-aze-cyrl-latn-1991
Script conversion system name	Azerbaijan Government – Alphabet Transition from Cyrillic to Latin
Script conversion system authority code	az
Language code type	iso-639-2
Language codes	aze
Source script code (ISO 15924)	Cyrl
Target script code (ISO 15924)	Latn
System ID	1991

System specification	Azerbaijani Government – Alphabet Transition from Cyrillic to Latin (1991)
Relationships	
Status	
Notes	NOTE OGC 11-122r1 code aze_Cyr12Latn_GAZ_1991; Azerbaijan's Milli Majlis (Parliament) adopted decree on conversion from Cyrillic to Latin script on December 25, 1991

Table C.145 – Streamlined Romanization system for Russian Cyrillic

Script conversion system code	bas-rus-cyrl-latn-2017
Script conversion system name	Streamlined Romanization system for Russian Cyrillic
Script conversion system authority code	bas
Language code type	iso-639-2
Language codes	rus
Source script code (ISO 15924)	Cyrl
Target script code (ISO 15924)	Latn
System ID	2017
System specification	Streamlined Romanization system for Russian Cyrillic
Relationships	
Status	
Notes	Date published: 2017

Table C.146 – Streamlined Romanization system for Russian Cyrillic – Basic Streamlined System

Script conversion system code	bas-rus-cyrl-latn-2017-bss
Script conversion system name	Streamlined Romanization system for Russian Cyrillic – Basic Streamlined System
Script conversion system authority code	bas
Language code type	iso-639-2
Language codes	rus
Source script code (ISO 15924)	Cyrl
Target script code (ISO 15924)	Latn
System ID	2017-bss
System specification	Streamlined Romanization system for Russian Cyrillic
Relationships	relatedTo:bas-rus-cyrl-latn-2017
Status	
Notes	Date published: 2017

Table C.147 – Streamlined Romanization system for Russian Cyrillic – Optimized Streamlined System

Script conversion system code	bas-rus-cyrl-latn-2017-oss
Script conversion system name	Streamlined Romanization system for Russian Cyrillic – Optimized Streamlined System
Script conversion system authority code	bas
Language code type	iso-639-2
Language codes	rus
Source script code (ISO 15924)	Cyrl
Target script code (ISO 15924)	Latn
System ID	2017-oss
System specification	Streamlined Romanization system for Russian Cyrillic
Relationships	relatedTo:bas-rus-cyrl-latn-2017
Status	
Notes	Date published: 2017

Table C.148 – BDS 1596:1973 Transliteration of Bulgarian Words with Latin Characters

Script conversion system code	bds-bul-cyrl-latn-1596-1973
Script conversion system name	BDS 1596:1973 Transliteration of Bulgarian Words with Latin Characters
Script conversion system authority code	bds
Language code type	iso-639-2
Language codes	bul
Source script code (ISO 15924)	Cyrl
Target script code (ISO 15924)	Latn
System ID	1596-1973

Table C.328 – ISO 843:1997 Information and documentation – Conversion of Greek characters into Latin characters

Script conversion system code	iso-ell-grek-latn-843-1997-t1
Script conversion system name	ISO 843:1997 Information and documentation – Conversion of Greek characters into Latin characters
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	ell
Source script code (ISO 15924)	Grek
Target script code (ISO 15924)	Latn
System ID	843-1997-t1
System specification	ISO 843 (all parts) Type 1 system
Relationships	
Status	
Notes	

Table C.329 – ISO 843:1997 Information and documentation – Conversion of Greek characters into Latin characters

Script conversion system code	iso-ell-grek-latn-843-1997-t2
Script conversion system name	ISO 843:1997 Information and documentation – Conversion of Greek characters into Latin characters
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	ell
Source script code (ISO 15924)	Grek
Target script code (ISO 15924)	Latn
System ID	843-1997-t1
System specification	ISO 843 (all parts) Type 2 system
Relationships	
Status	
Notes	

Table C.330 – ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters

Script conversion system code	iso-guj-gujr-latn-15919-2001
Script conversion system name	ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	guj
Source script code (ISO 15924)	gujr
Target script code (ISO 15924)	Latn
System ID	15919-2001
System specification	ISO 15919:2001
Relationships	
Status	
Notes	

Table C.331 – ISO 259:1984 Documentation – Transliteration of Hebrew characters into Latin characters

Script conversion system code	iso-heb-hebr-latn-259-1984
Script conversion system name	ISO 259:1984 Documentation – Transliteration of Hebrew characters into Latin characters
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	

	heb
Source script code (ISO 15924)	Hebr
Target script code (ISO 15924)	Latn
System ID	259-1984
System specification	ISO 259 (all parts)
Relationships	
Status	
Notes	

Table C.332 – ISO 259-2:1994 Documentation – Transliteration of Hebrew characters into Latin characters. – Part 2: Simplified transliteration

Script conversion system code	iso-heb-hebr-latn-259-2-1994
Script conversion system name	ISO 259-2:1994 Documentation – Transliteration of Hebrew characters into Latin characters. – Part 2: Simplified transliteration
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	heb
Source script code (ISO 15924)	Hebr
Target script code (ISO 15924)	Latn
System ID	259-2-1994
System specification	ISO 259-2
Relationships	
Status	
Notes	

Table C.333 – ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters

Script conversion system code	iso-hin-deva-latn-15919-2001
Script conversion system name	ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	hin
Source script code (ISO 15924)	Deva
Target script code (ISO 15924)	Latn
System ID	15919-2001
System specification	ISO 15919:2001

Relationships	
Status	
Notes	

Table C.334 – ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters

Script conversion system code	iso-inc-deva-latn-15919-2001
Script conversion system name	ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	inc
Source script code (ISO 15924)	Deva
Target script code (ISO 15924)	Latn
System ID	15919-2001
System specification	ISO 15919:2001
Relationships	
Status	
Notes	

Table C.335 – ISO 3602:1989 Documentation – Romanization of Japanese (kana script)

Script conversion system code	iso-jpn-hrkt-latn-3602-1989
Script conversion system name	ISO 3602:1989 Documentation – Romanization of Japanese (kana script)
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	jpn
Source script code (ISO 15924)	Hrkt

System ID	3602-1989
System specification	ISO 3602:1989
Relationships	
Status	
Notes	

Table C.336 – ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters

Script conversion system code	iso-kan-knda-latn-15919-2001
Script conversion system name	ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters

Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	kan
Source script code (ISO 15924)	Knda
Target script code (ISO 15924)	Latn
System ID	15919-2001
System specification	ISO 15919:2001
Relationships	
Status	
Notes	

Table C.337 – ISO 9984:1996 Information and documentation – Transliteration of Georgian characters into Latin characters

Script conversion system code	iso-kat-geor-latn-9984-1996
Script conversion system name	ISO 9984:1996 Information and documentation – Transliteration of Georgian characters into Latin characters
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	kat
Source script code (ISO 15924)	Geor
Target script code (ISO 15924)	Latn
System ID	9984-1996
System specification	ISO 9984:1996
Relationships	
Status	
Notes	

Table C.338 – ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters

Script conversion system code	iso-mal-mlym-latn-15919-2001
Script conversion system name	ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	mal
Source script code (ISO 15924)	Mlym
Target script code (ISO 15924)	Latn

System ID	15919-2001
System specification	ISO 15919:2001
Relationships	
Status	
Notes	

Table C.339 – ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters

Script conversion system code	iso-mar-deva-latn-15919-2001
Script conversion system name	ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	mar
Source script code (ISO 15924)	Deva
Target script code (ISO 15924)	Latn
System ID	15919-2001
System specification	ISO 15919:2001
Relationships	
Status	
Notes	

Table C.340 – ISO 9:1995 Information and documentation – Transliteration of Cyrillic characters into Latin characters – Slavic and non-Slavic languages

Script conversion system code	iso-mkd-cyrl-latn-9-1995
Script conversion system name	ISO 9:1995 Information and documentation – Transliteration of Cyrillic characters into Latin characters – Slavic and non-Slavic languages
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	mkd
Source script code (ISO 15924)	Cyrl
Target script code (ISO 15924)	Latn
System ID	Sep-95
System specification	IWA 9 (all parts)
Relationships	
Status	
Notes	

Table C.341 – ISO 9:1995 Information and documentation – Transliteration of Cyrillic characters into Latin characters – Slavic and non-Slavic languages

Script conversion system code	iso-mon-cyrl-latn-9-1995
Script conversion system name	ISO 9:1995 Information and documentation – Transliteration of Cyrillic characters into Latin characters – Slavic and non-Slavic languages
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	mon
Source script code (ISO 15924)	Cyrl
Target script code (ISO 15924)	Latn
System ID	Sep-95
System specification	IWA 9 (all parts)
Relationships	
Status	
Notes	

Table C.342 – ISO 9:1995 Information and documentation – Transliteration of Cyrillic characters into Latin characters – Slavic and non-Slavic languages

Script conversion system code	iso-mul-cyrl-latn-9-1995
Script conversion system name	ISO 9:1995 Information and documentation – Transliteration of Cyrillic characters into Latin characters – Slavic and non-Slavic languages
Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	mul
Source script code (ISO 15924)	Cyrl
Target script code (ISO 15924)	Latn
System ID	Sep-95
System specification	IWA 9 (all parts)
Relationships	
Status	
Notes	NOTE mul here represents non-Slavic languages supported by this system

Table C.343 – ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters

Script conversion system code	iso-nep-deva-latn-15919-2001
Script conversion system name	ISO 15919:2001 Information and documentation – Transliteration of Devanagari and related Indic scripts into Latin characters

Script conversion system authority code	iso
Language code type	iso-639-2
Language codes	nep
Source script code (ISO 15924)	Deva

Script conversion system code	var-asm-beng-latn-hunterian-1872
Script conversion system name	Assamese Bengali Hunterian System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	asm
Source script code (ISO 15924)	Beng
Target script code (ISO 15924)	Latn
System ID	hunterian-1872
System specification	Hunterian System
Relationships	
Status	
Notes	

Table C.461 – Bengali Hunterian System

Script conversion system code	var-ben-beng-latn-hunterian-1872
Script conversion system name	Bengali Hunterian System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	ben
Source script code (ISO 15924)	Beng
Target script code (ISO 15924)	Latn
System ID	hunterian-1872
System specification	Hunterian System
Relationships	
Status	
Notes	

Table C.462 – Blackfoot (Pikani/Siksika) Canadian Aboriginal Syllabics System

Script conversion system code	var-bla-cans-latn-omniglot-1888
Script conversion system name	Blackfoot (Pikani/Siksika) Canadian Aboriginal Syllabics System
Relationships	
Status	
Notes	

Script conversion system authority code	var
Language code type	iso-639-2
Language codes	bla
Source script code (ISO 15924)	Cans
Target script code (ISO 15924)	Latn
System ID	omniglot-1888
System specification	Canadian Aboriginal Syllabics for Blackfoot (Pikani/Siksika)
Relationships	
Status	
Notes	

Table C.463 – Cree Canadian Aboriginal Syllabics System

Script conversion system code	var-cre-cans-latn-omniglot-1840
Script conversion system name	Cree Canadian Aboriginal Syllabics System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	cre
Source script code (ISO 15924)	Cans
Target script code (ISO 15924)	Latn
System ID	omniglot-1840
System specification	Canadian Aboriginal Syllabics for Cree
Relationships	
Status	
Notes	

Table C.464 – Dakelh (Carrier) Canadian Aboriginal Syllabics System

Script conversion system code	var-crx-cans-latn-omniglot-1885
Script conversion system name	Dakelh (Carrier) Canadian Aboriginal Syllabics System
Script conversion system authority code	var
Language code type	iso-639-3
Language codes	crx
Source script code (ISO 15924)	Cans
Target script code (ISO 15924)	Latn
System ID	omniglot-1885

System specification	Canadian Aboriginal Syllabics for Dakelh (Carrier)
Relationships	
Status	
Notes	

Table C.465 – Slavey Canadian Aboriginal Syllabics System

Script conversion system code	var-den-cans-latn-omniglot
Script conversion system name	Slavey Canadian Aboriginal Syllabics System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	den
Source script code (ISO 15924)	Cans
Target script code (ISO 15924)	Latn
System ID	omniglot
System specification	Canadian Aboriginal Syllabics for Slavey
Relationships	
Status	
Notes	

Table C.466 – Hindu Devanagari Hunterian System

Script conversion system code	var-hin-deva-latn-hunterian-1872
Script conversion system name	Hindu Devanagari Hunterian System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	hin
Source script code (ISO 15924)	Deva
Target script code (ISO 15924)	Latn
System ID	hunterian-1872
System specification	Hunterian System
Relationships	
Status	
Notes	

Table C.467 – Hepburn System

Script conversion system code	var-jpn-hrkt-latn-hepburn-1867
Script conversion system name	Hepburn System

Script conversion system authority code	var
Language code type	iso-639-2
Language codes	jpn
Source script code (ISO 15924)	Hrkt
Target script code (ISO 15924)	Latn
System ID	hepburn-1867
System specification	A Japanese and English Dictionary: with an English and Japanese Index
Relationships	
Status	
Notes	1867-12-31

Table C.468 – Traditional Hepburn System

Script conversion system code	var-jpn-hrkt-latn-hepburn-1886
Script conversion system name	Traditional Hepburn System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	jpn
Source script code (ISO 15924)	Hrkt
Target script code (ISO 15924)	Latn
System ID	hepburn-1886
System specification	A Japanese-English And English-Japanese Dictionary
Relationships	basedOn:var-jpn-hrkt-latn-hepburn-1867
Status	
Notes	

Table C.469 – Modified Hepburn System

Script conversion system code	var-jpn-hrkt-latn-hepburn-1954
Script conversion system name	Modified Hepburn System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	jpn
Source script code (ISO 15924)	Hrkt
Target script code (ISO 15924)	Latn

System ID	hepburn-1954
System specification	Japanese Modified Hepburn 1954 System
Relationships	relatedTo:var-jpn-hrkt-latn-hepburn-1886
Status	
Notes	

Table C.470 – Modified Hepburn System

Script conversion system code	var-jpn-hrkt-latn-hepburn-1974
Script conversion system name	Modified Hepburn System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	jpn
Source script code (ISO 15924)	Hrkt
Target script code (ISO 15924)	Latn
System ID	hepburn-1974
System specification	Japanese Modified Hepburn 1974 System
Relationships	relatedTo:var-jpn-hrkt-latn-hepburn-1886
Status	
Notes	

Table C.471 – Rōmaji-hiromekai Hyōjun-shiki

Script conversion system code	var-jpn-hrkt-latn-hyojun-1908
Script conversion system name	Rōmaji-hiromekai Hyōjun-shiki
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	jpn
Source script code (ISO 15924)	Hrkt
Target script code (ISO 15924)	Latn
System ID	hyojun-1908
System specification	Hyōjun-shiki Romaji
Relationships	basedOn:var-jpn-hrkt-latn-hepburn-1886
Status	
Notes	1908-05-22

Table C.472 – JSL

Script conversion system code	var-jpn-hrkt-latn-jsl-1987
Script conversion system name	JSL
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	jpn
Source script code (ISO 15924)	Hrkt
Target script code (ISO 15924)	Latn
System ID	jsl-1987
System specification	Japanese, The Spoken Language
Relationships	basedOn:mext-jpn-hrkt-latn-1954
Status	
Notes	1987-09-10

Table C.473 – Korean Yale 1942 System

Script conversion system code	var-kor-hang-latn-yale-1942
Script conversion system name	Korean Yale 1942 System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	kor
Source script code (ISO 15924)	Hang
Target script code (ISO 15924)	Latn
System ID	yale-1942
System specification	Yale Romanization
Relationships	
Status	
Notes	

Table C.474 – Kurdish J.C. Edmonds Romanization System (1931)

Script conversion system code	var-kur-arab-latn-edmonds-1931
Script conversion system name	Kurdish J.C. Edmonds Romanization System (1931)
Script conversion system authority code	var
Language code type	iso-639-2

Language codes	kur
Source script code (ISO 15924)	Arab
Target script code (ISO 15924)	Latn
System ID	edmonds-1931
System specification	Kurdish 1931 J.C. Edmonds Romanization System
Relationships	
Status	
Notes	NOTE OGC 11-122r1 code kur_Arab2Latn_EDMONDS_1931

Table C.475 – Marathi Devanagari Hunterian System

Script conversion system code	var-mar-deva-latn-hunterian-1872
Script conversion system name	Marathi Devanagari Hunterian System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	mar
Source script code (ISO 15924)	Deva
Target script code (ISO 15924)	Latn
System ID	hunterian-1872
System specification	Hunterian System
Relationships	
Status	
Notes	

Table C.476 – Naskapi Canadian Aboriginal Syllabics System

Script conversion system code	var-nsk-cans-latn-omniglot-1840
Script conversion system name	Naskapi Canadian Aboriginal Syllabics System
Script conversion system authority code	var
Language code type	iso-639-3
Language codes	nsk
Source script code (ISO 15924)	Cans
Target script code (ISO 15924)	Latn
System ID	omniglot-1840
System specification	Canadian Aboriginal Syllabics for Naskapi
Relationships	

Status	
Notes	

Table C.477 – Ojibwa Canadian Aboriginal Syllabics System

Script conversion system code	var-oji-cans-latn-omniglot-1840
Script conversion system name	Ojibwa Canadian Aboriginal Syllabics System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	oji
Source script code (ISO 15924)	Cans
Target script code (ISO 15924)	Latn
System ID	omniglot-1840
System specification	Canadian Aboriginal Syllabics for Ojibwa
Relationships	
Status	
Notes	

Table C.478 – Oriya Hunterian System

Script conversion system code	var-ori-orya-latn-hunterian-1872
Script conversion system name	Oriya Hunterian System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	ori
Source script code (ISO 15924)	Orya
Target script code (ISO 15924)	Latn
System ID	hunterian-1872
System specification	Hunterian System
Relationships	
Status	
Notes	

Table C.479 – Birnbaum Ottoman Turkish System

Script conversion system code	var-ota-arab-latn-birnbaum-1967
Script conversion system name	Birnbaum Ottoman Turkish System
Script conversion system authority code	var
Language code type	

	iso-639-2
Language codes	ota
Source script code (ISO 15924)	Arab
Target script code (ISO 15924)	Latn
System ID	birnbaum-1967
System specification	The transliteration of Ottoman Turkish
Relationships	
Status	
Notes	

Table C.480 – Panjabi Gurmukhi Hunterian System

Script conversion system code	var-pan-guru-latn-hunterian-1872
Script conversion system name	Panjabi Gurmukhi Hunterian System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	pan
Source script code (ISO 15924)	Guru
Target script code (ISO 15924)	Latn
System ID	hunterian-1872
System specification	Hunterian System
Relationships	
Status	
Notes	

Table C.481 – IAST Prakrit Devanagari System

Script conversion system code	var-pra-deva-latn-iaast-1912
Script conversion system name	IAST Prakrit Devanagari System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	pra
Source script code (ISO 15924)	Deva
Target script code (ISO 15924)	Latn
System ID	iaast-1912
System specification	IAST 1912

Relationships	
Status	
Notes	

Table C.482 – IAST Sanskrit Devanagari System

Script conversion system code	var-san-deva-latn-iastr-1912
Script conversion system name	IAST Sanskrit Devanagari System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	san
Source script code (ISO 15924)	Deva
Target script code (ISO 15924)	Latn
System ID	iastr-1912
System specification	IAST 1912
Relationships	
Status	
Notes	

Table C.483 – Tamil Hunterian System

Script conversion system code	var-tam-tamI-latn-hunterian-1872
Script conversion system name	Tamil Hunterian System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	tam
Source script code (ISO 15924)	TamI
Target script code (ISO 15924)	Latn
System ID	hunterian-1872
System specification	Hunterian System
Relationships	
Status	
Notes	

Table C.484 – Telugu Hunterian System

Script conversion system code	var-tel-telu-latn-hunterian-1872
Script conversion system name	Telugu Hunterian System
Script conversion system authority code	var

Language code type	iso-639-2
Language codes	tel
Source script code (ISO 15924)	Telu
Target script code (ISO 15924)	Latn
System ID	hunterian-1872
System specification	Hunterian System
Relationships	
Status	
Notes	

Table C.485 – Arabic Hunterian System

Script conversion system code	var-urd-arab-latn-hunterian-1872
Script conversion system name	Arabic Hunterian System
Script conversion system authority code	var
Language code type	iso-639-2
Language codes	urd
Source script code (ISO 15924)	Arab
Target script code (ISO 15924)	Latn
System ID	hunterian-1872
System specification	Hunterian System
Relationships
